<https://itsmanvir.com/>

OBJECTIVE

Highly skilled self-taught Front-end Developer with 2 years of coding experience. Seeking opportunities to leverage my strong coding skills, creative problem-solving abilities, and self-motivated nature to contribute to dynamic projects and further enhance my front-end development expertise.

SKILLS

Design: Canva, Adobe Photoshop basics

Front-end skills: HTML, CSS, JavaScript, React, Sass, Framer
Motion Animations, and Bootstrap

Tools: GitHub, Visual Studio, VS Code

PROJECTS

Portfolio Website

Technologies: CSS, JavaScript, React and Framer Motion React library

<https://itsmanvir.com/>

- Interactive and visually stunning front-end portfolio showcasing all of my front-end development projects and also one blog web app.

E-Commerce Project – Product Villa

Technologies: CSS, JavaScript, React and third party libraries

<https://productvilla.netlify.app/>

- Implemented essential features including product catalog, product detail pages, shopping cart functionality, flyer, store location, and checkout process.
- Fetching the data from different APIs, combining and sorting it into the different product categories.
- Ensured optimal user experience through modern design principles and UI/UX best practices.
- Tested and debugged the website across multiple browsers, screen sizes, and devices to ensure compatibility and responsiveness.

Product landing Project – Smart Fit Watch

Technologies: CSS, JavaScript, React

<https://smartfitwatch.netlify.app/>

- Created a product landing page for the Smart Fit Watch, showcasing its features and manual.
- Implemented a visually appealing header section with a prominent call to action.
- Included engaging multimedia elements such as high-quality product images.
- Highlighted the key features of the Smart Fit Watch, such as fitness tracking, heart rate monitoring, and sleep analysis.

Quiz Project – Quizzical

Technologies: CSS, JavaScript, React

<https://manvir1947.github.io/quiz-app/>

- Implement user authentication functionality, start the quiz with a custom name, and gives options to start the next session with the same or the new one.
- Display immediate feedback to users for each question they answer. Highlight correct and incorrect answers.
- A timer for each quiz section creates a sense of urgency and simulates real exam conditions.
- Fetch quiz questions from a third-party API and handle the data asynchronously.

Movie Comparison Project – Movie Fight

Technologies: CSS, JavaScript, React

<https://manvir1947.github.io/movie-fight/>

- Allow users to enter the names or titles of two movies and auto-complete suggestions to assist them in finding the correct movie names.
- A responsive and mobile-friendly layout, appealing on various devices, including desktops, tablets, and smartphones.
- Retrieve data from a third-party movie database API, and provide a side-by-side comparison of key metrics, to evaluate and choose between the two movies.

EDUCATION

Canadore College , Mississauga Business Management	Jan 2020 – Aug 2020
Sault College , Sault Ste. Marie Public Relations and Event Management	Jan 2019 – Dec 2019
Panjab University , India Bachelor of Arts	Aug 2014 – May 2017

PROGRAMMING COURSES

- Beginning C++ Programming – From Beginner to Beyond – Dr. Frank Mitropoulos (Udemy)
- The Complete JavaScript Course 2023: From Zero to Expert – Jonas Schmedtmann (Udemy)
- Complete Python Developer in 2023: Zero to Mastery
- JS, React Documentations, and Mdn web docs
- Free Code Camp, Scrimba, Youtube
